Summary

I am a highly dedicated and skilled professional with extensive experience in various fields. Currently working at the Medicalised Health Centre in Buea as both a Community Health Worker and a Sterilisation Technician, I played a pivotal role in successful vaccination and deworming campaigns, responding to cholera outbreaks, and managing the COVID-19 pandemic. Additionally, I have excelled as a Canine Trainer, ensuring well-mannered behavior in dogs and specializing in security dog training. I also possesses excellent driving and customer service skills from my experience as a Commercial Driver. Furthermore, I have proven expertise as a Security Agent and Cleaner, effectively monitoring and securing premises while maintaining a clean and safe environment. With a diverse skill set, strong work ethic, and a passion for community health and safety, I am a valuable asset in various professional settings.

Work experience	Medicalised health Centre Muea, Buea	March 2013 – Present
	Community Health worker	<ul style="list-style-type: none">■ Vaccination and Deworming Distribution: Played a pivotal role in the successful distribution of vaccines and deworming medications to community members. Collaborated closely with healthcare professionals, local authorities, and non-governmental organizations to ensure seamless implementation of immunization campaigns, significantly contributing to disease prevention and control.■ Cholera Outbreak Response: During the outbreak of cholera in our community, I swiftly coordinated emergency response efforts. Conducted door-to-door visits to identify affected individuals, provided immediate care and support, and educated the community on preventive measures. My prompt actions and health awareness efforts helped to mitigate the spread of the disease and saved lives.■ COVID-19 Pandemic Management: Stepped up efforts during the COVID-19 pandemic by engaging in awareness campaigns about the virus, transmission, and preventive measures. Distributed personal protective equipment (PPE) and hygiene kits to vulnerable households, ensuring the safety of community members. Conducted regular health screenings and facilitated testing drives, enabling early detection and containment of infections.■ Health and Hygiene Sensitization: Conducted community workshops and

health talks on various health topics, emphasizing the importance of maintaining proper hygiene and sanitation practices. Addressed issues related to nutrition, reproductive health, family planning, and disease prevention, empowering community members with the knowledge to make informed health decisions.

- Collaborative Partnerships: Fostered strong relationships with local health organizations, community leaders, and volunteers to enhance the reach and impact of health initiatives. Actively participated in inter-agency meetings and task forces to strengthen coordination and optimize resource allocation for public health projects.

Medicalised health Centre Muea, Buea

March 2013 – Present
